Dear Sirs or Madams:

Enclosed is a card which hopefully will reach a few concerned people. These senseless experiments on ALL species are causing extreme concerns for me and many others. The FDA seems to be deficient in so many areas and I have expressed my opposition to many things in the past. Some things need more and immediate approval but are delayed indefinitely at the cost of extreme suffering and at times deaths. I would like to know where the problem lies with that Government agency or probably like so many of the projects, we can not depend on any of them. These inhumane tests which may cause serious side affects must not be approved by any agency. Many of us do not have faith in any portion of the government and most of all this administration because they do not work for the wefare and benefit of the citizens. Give some serious thought to this type of experimenting as I know from personal experience what the Swine Flu virus did to me.

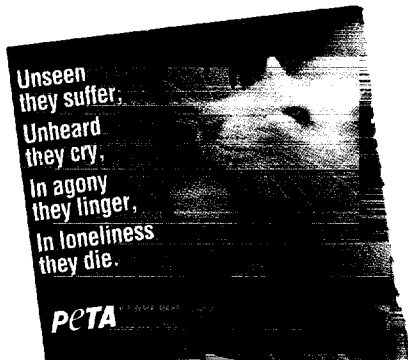

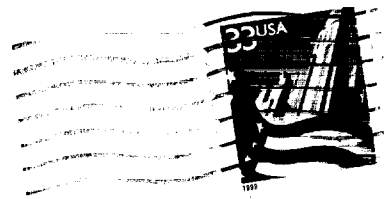

Sincerely,

Virginia Mullison

"Ever occur to you why some of us can be this much concerned with animals suffering? Because government is not. Why not? Animals don't vote."

Paul Harvey

Mrs. Virginia Mullison
